Subject: RE: DS&G PFCs Sampling Work Plan
Attachments: DESG - Tables 1-3_PFOA_PFOS_Results.pdf

Doug,

Based on Region 3's expedited review, EPA approves the procedures, analytical method and laboratory proposed in the SAP for PFC analysis. However, only one UPCUTZ groundwater sample is proposed to be collected and analyzed for PFCs and no samples are proposed to be collected from the Columbia Aquifer at the DDA for analysis of PFCs. Groundwater samples should be collected from the Columbia Aquifer and UPCUTZ in areas where the highest concentrations of other site-related COCs have been found and the samples should be analyzed for PFCs. This group of additional wells should include, but not be limited to, the locations previously sampled by EPA (see attached data summary table).

EPA's Headquarters is reviewing response actions involving PFCs and may have additional comments. If so, I will forward those to you so that they can be addressed for future sampling events.

Debbie

Subject: DS&G PFCs Sampling Work Plan

Hi Debbie,

Please find attached the work plan for sampling and analysis of PFCs at the DS&G Site. Our routine semi-annual monitoring event will begin on September 26, 2016 and is expected to last three weeks. We will initiate sampling of selected wells for PFCs late next week.

Please let us know if you have any questions or need additional information.

Thanks, Theresa
